# Compromise: Conflict Resolution

For example, from the original SCAT table, the entry is as below:

053 > D 0001     D 0899.999     43     History(General)

After adding SuDoc ranges, the entries become as below:

061 > D 0000     D 0305.999     625     U.S. Dept. of Defense

062 > D 0306     D 0899.999     43     History(General)

The problem:

There are about 1,600 LC # that range from D1 to D305 overlapping with SuDoc#.

The size of SuDoc # ranges from D1 – D305 is about 10,500, which is much bigger than LC # ranges.

This is not an ideal resolution but a compromise.

## 4. Remaining Problems

- **Some SuDoc call # that have only a few titles are not in the SCAT table**
- **No entries for some 'non-standard' LC call #**
- **No entries for local call #**
- **Don't use Dewey call #**
- **Some entries overlap between SuDoc call # and LC call #**

## 5. Next Step

- **Purchase an additional SCAT table for SuDoc call#**
- **Associate SuDoc call# with the new SCAT table**
- **Remove SuDoc call # index from the current SCAT table**
- **Add SuDoc call# entries to the new SCAT table**
- **Revise and test the two SCAT tables**
- **Collaboration**
- **Education**
