April 29, 2016 minutes were approved as presented.

The committee went through the data that Tom had presented on the SEOIs. The committee discussed what types of information can be conferred from the data. The committee discussed the potential to look at the variance by faculty, analysis of the variance and mean. Look at instructors who have taught 4 or more courses. Look at the correlation by response rates to the questions. Do larger classes have a lower response rates? Expected grade does not appear to be correlated at all.

For the next meeting the committee members need to look at the correlations of the data. Also the committee will look at the Senate evaluation information.

Meeting adjourned at 2:56 p.m.
