Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.

Black Mountain area. Relative thicknesses are shown. Unit and unconformity dips
and early to middle Pleistocene volcanic and sedimentary rocks exposed in the
Plate 2.
