If all the editors on the staff of the Student Spirit which have been published in the numerous school papers, were bound to 가지고 있다. 그리고 이들 중 하나의 볼 수 있는 오해의 소지가 있다면. the feeling of appreciation for the privilege of being made the center of work and attention by the most capable and highly educated minds of the hour, who are generously backed by an able and interested public. The greatest advantage that the school can receive is the success garnered by the students, through the thorough education which it makes possible. Yet, as students, do we realize the help of the faculty? Do we appreciate the donations and sacrifice of society for our education? Do we, if we have real school spirit, which is fundamentally based on appreciative intelligence.

New times school spirit is mistaken for the more common conception which is only a coarse type of animal antagonism. It is a narrow-minded conception which binds us to the good qualities of our opponents, especially those in competing schools. We think of our teams as true knights in modern armor fighting against a gang of villains who represent the other institution. This is one of the reasons why our opponents brand our entire school as "poor sports" while the same act by an individual of the home team is admired as "Fight and conquer." The question of intercollegiate sport is not a question of how we play but a question of whether or not we are capable of being fair. The school spirit should be Educated Emotions. Then it would appreciate facts.

To sum up the whole matter we can say: That appreciation of the school creates school spirit. That such appreciation always precedes constructive participation. That intelligent participation is always well paid in life. That School Spirit is Culture, it is Educated Emotions.

In conclusion, let me always emphasize the importance of the elimination of intolerance. That this elimination of intolerance applies very aptly to activities in our own school as well as to intercollegiate activities in which our school is represented.

In other words: Use your head and appreciate—then boost and benefit.

U. of W. Frosh Girls Must Wear Large Green Bow

UNIVERSITY OF WASHINGTON, Seattle, May 16.—Freshman rules may be enforced, according to the campus of the University of Washing- tag by a sophomore vigilance committee, instead of the old fresh- men tradition committee, according to a plan advanced here by the senior council and the general cor- ditions committee.

Changes are that the freshmen, left to themselves, had not caused enforcement of the wearing of green hats, had permitted smoking on the campus, and association with students.

It was also decided that in the future, the young clothes of the yearling class will force to de- charge their fine stamps by wearing a large green bow at all times. Practically all the large univer- sities in the United States have sophomore vigilance committees, the officials learned.
