CRIMSON "W" TO GIVE INFORMAL

Lovel Patti
Monday Night

There is map and action in the bril-
lant program offered by Mr. Lovel Patti
and his talented assistants, in the
informal theater on Monday.

"FIREFLY" TO APPEAR MARCH 23 AND 24

"Mr. Fish Passes By" Cast Is Announced

As a result of the tryouts for the play "Mr. Fish Passes By" the cast has been chosen.

At present the cast of the play which is being coached by Miss Schil-
berg will be made up of the following members.

Mr. George Morden, an English
country gentleman, Jack Shreiber; Ot-
Olt; his wife, the former Mrs. Ted-
worth, Josephine Hugon; Mr. Fish, who
participated in the play "The Bachelorette's Ball" at the University; and Miss
Dinga.

"Mr. Fish Passes By" (Continued on Page Two)

Lunchen Given For Prof. Osborne

An informal luncheon was given for
Prof. Osborne, head of the depart-
ment of physics at the University.

Head of the university in charge
of the department of physics, Prof. Os-
borne, was present, including Prof. Osborne, who

Prof. Osborne gave a series of in-
teresting lectures on physics the first
part of the week, and with the en-
semble of the faculty was present.

Luncheon Given (Continued on Page Four)

LEONARD SELEcTS FIVE CHEMISTS

For C. C. assembly, Monday, March 17, Leonard selected the five men whom he considered the great contributors to the world of chemistry.

His select committee, with a brief bi-
ographical sketch of each in full

town of Easton, Mass. (14)

University Frosh Wildcats Twice Here

Good program has been made this
week-end in taking the various club
and other organization pictures for
the Frosh and the work is now
practically completed. The following
have had group pictures taken: the
Scrubulls club and the Heraldtis,
Physics, the Science, Art and Crim-
son W clubs, the Men's Dorm, Kin-
na hall association, Homoeconomics
and Sigma Pi, who have pictures of
their officers only. Those or-
ganizations are paying $1 per page
to cover the cost of the pictures,
including the same in the annual. Ten
dollars of this should be paid in
to the business manager or before
Thursday, March 16. The balance
will be due and be due the end of
March.

The Frosh gym and basketball ac-
dressing will be done by Miss
Hyakem Pictures, for the evening's entertain-
music and dancing, so including gratis
pictures of the athletes, their sweethearts, and all are endowed musically in a
greater degree, no matter what the fancy might
suggest.

The emancipation of womankind
is a favorite subject of Prof. Os-
borne, and he has been engaged in
the course of "The first woman in
the world." He believed that we
were able, and the public has been
informed to this effect. All are richly rewarded for the evening's entertain-
ments and all are endowed musically in a
greater degree, no matter what the fancy might
suggest.

The poems who sang of the good old summertime might well change their wording—but not their thought—by making immoral the phrase "In the good old tennis days when the world was synonymouse, Thoughts of spring and summer, of sunny days and gray, and flowers are closely interwoven with dreams of the court, net, raquet and ball and the face of their opponent, Registering grim determination or jolly rivalry.

No game is comparable to tennis in its freedom, joyfulness and comradeship and yet with all this it combines a necessity for alertness, accuracy and skill that delights his most exacting. It is like a bird soaring through the air, which at will can come to rest on the finest wire of the smallest twig of a tree.

Tennis is exhilarating. One can go into a game of tennis almost mentally exhausted and come out fresh and relaxed.

Tennis is indeed a glorious sport—and tennis time is almost here.

HABITS IN THE MAKING

"We are all mere walking bundles of habits," said the eminent psychologist, James.

When the average person hears the word habit he immediately associates it with some undesirable quality or characteristic such as delinquency, profanity or gambling. But there are good habits as well as bad, virtues are habits as much as vices are.

Practically all of our behavior throughout life is based upon habits, both good and bad.

From the Cradle to the grave we are forming and strengthening habits, good habits making life easy and smooth, while bad habits slowly conquer and ruin our lives.

Good habits make for happiness and efficiency, bad habits for sorrow and inefficiency. Which do we want?

We can have either by paying the price. In either case we must invest and later reap our rewards for better or for worse.

Education itself is a matter of habit formation. It is the organization of acquired habits of conduct and tendency to behavior.

We are here in school, building up a system of habits that will determine the character of our behavior in later life.

Which type of habits are we acquiring—desirable or undesirable?

To the who in the love of nature habit.

Companion with her visible forms she speaks.

A various lesson, for his gayer hours.

She has a voice of gladness and a smile of hope.

An eloquence of beauty and a glint into the future.

And healing sympathy that steals away

Their sharpness, 'tis we are aware.

—From Bryant's "Thanatopsis"

Winner of Dry Cleaning Contest

The winner of the "dry cleaning essay contest" conducted by the K. E. (Cheaper) Dry Cleaning in cooperation with Miss Dorrell's clothing class was announced this week as Mrs. Deborah Demon. Honorable mention was given essays written by Frances Hampson and Mrs. Bernice Potts.

The essay which won the $5.00 coupon for the K. E. cleaning contest follows:

Dry cleaning is a modern method of cleaning clothing made of woolen and siles by the use of benzene.

This is a solvent that is not afraid of the professional cleaner for three reasons. First, it requires more and better equipment than would be advisable to have in the home; second, to remove spots requires a careful study of textile, the chemical nature of the spot and the substance that will remove it without having the garments, and lastly; dry-cleaning is smart that requires knowledge and skill to do successfully and only those who have made a careful study of the matter are really capable cleaners.

"Benzine is the liquid that is used to clean the garments. This is used because it removes dirt and grease from the garment, nor to cause it to lose its shape."

"This method of cleaning clothes has many advantages. The one big advantage that is in my opinion should lead the list is sanitation. Garments made of very delicate material that would be ruined by any other method of cleaning, may be kept fresh and clean by sending them occasionally to dry cleaners. Other garments even heavy coats and sweaters may be treated the same way with exceptionally good results and all clothing is made to last 20 per cent free from disease germs."

"Next on the list of advantages is that dry-cleaning actually prolongs the life of the material. The grit, grime and dirt that collects on clothing is removed from the fiber that makes up the material. The use of the steam press is also a new device by which steam penetrates the material thus reviving the nap and giving the garment the appearance of a new one."

"Then there is the advantage that appeals quite strongly to all of us. It is the ease with which it can be accomplished. All that is necessary is a phone call and the dry-cleaning job is done. And best of all the bill is surprisingly low for the value received."

KAPPA PI MEETS
After a short business session the
meeting was turned over to the
program committee, March 2.
Miss Ethelsette spoke of her expe-
riences while teaching in the kind-
ergarten.
Miss Mary Short told of her teach-
ing experiences in the first grade
and Miss Baby Gump spoke of her teach-
ing experience in the second grade.
At the next meeting a report of
the nominating committee will be
given.

Clean Out Winter Dust
Now is the time to extract from
your rugs and carpet the dust
that has bruised the beauty of them.
With our special equipment for
this particular work you may be assured
of the most pleasant and,
nice results.

Draperies, too
We give this class of work
our most exacting attention.
Send us these curtains, portier-
es and similar indoor furni-
shings and we will send them
back to you in that fresh, clean,
beautiful condition that rivals their original appearance.

EXCHANGES

The U. of W. polo team made its debut last Saturday afternoon when four of the local students, playing under O. colors, just the National Guard polo team, were defeated by a score of 22 to 17. If the challenge received from A. C. is accepted the polo team will be placed on the payroll of regular intercollegiate sports in addition to O. A. C. and Stanford and U. of Arizona.

The Cannadians do not allow titles to be a religion. The British Columbia students added more to the radio studio. They never think of getting letters into studios. The absence of eligible opponents in the province stands as a barrier while the faculty rivalry which happens American football from British Columbia sports program in another laying lack of interest in letters.—From the U. of W. Daily.

President Lamphere of Maryville Teachers College of Missouri left on February 24 for Dallas Texas where he will attend the meeting of the Department of Superintendents of the National Education Association.

The new Henry Art Museum is rapidly gaining fame as one of the finest art centers in the Northwest. Over 4,000 guests register- ed in two weeks.

Luna Ticks

The time, the place, and the girl are seldom found together. The girl is seldom late for the Paget Sound Trail. However, it was a half hour late, in some cases, than to be a couple of seconds late. We personally knew of a case where a man was just one second late at a crossing. He’s been spoken of as “The late Mr. Jones” ever since.

If the affair mentioned Mr. Jones had been a half hour late, the chances are he would have been just plain gone yet.

However, if the girl is just one second late, she will probably find her seat is still waiting for her, and probably he will be so grateful that he will not say anything about her being late. He will blame it on his watch.

And it is decidedly better to be one second late than to be a half hour late. Some girls are inclined to be a bit morebmpant than if you were a full half hour late.

Then, too, if you’re serving, and you’re too late to help your partner set up the table and get the grub, you’re more likely to fail to appear on the scene at all, or you’re likely to be too busy to get around to you.

You can’t always sometimes tell. Sometimes it’s better to be one second later than never, and sometimes never later than one second late. Take your pick and pay the clerk.

Notwithstanding the fact that we were discussing the subject of late- comers, we are going to be late for press if we don’t ring off, so that’s what we’re going to do.

There lived a man in our town...

And he came home late from town one night and got me by a plate.

CAVE MEN IN THE MAKING

Psychologists and evolutionists keep telling us that the greatest extent of environment influences the nature and organization of an organism. The architect of designing John Lombard, evidently to take this important fact into consideration. This building effect a concrete example of this environmental influence. You see, in the Portland cement center of the word.

As you already know this building, building, consisting of the hundred percent for proof type, consists principally of brick, plaster and concrete. These are materials equally similar to that contained in the floors, walls, and brick walls in the homes of our remote ancestors, who also lived in fire-proof homes.

When an inmate of this elegant edifice retreats into his room he finds himself in surroundings not unlike those of our cave-dwelling progenitors.

He may draw his chair across the concrete floor and seat himself with his book leaned against a cement wall and his feet resting by a brick window still as did his paleolithic forefather.

So girls don’t be alarmed if John Lombard develops a touch of caveman.

BURBANK MEETING POSTPONED

Due to the prevailing epidemic of influenza, the regular monthly meeting of the Bellingham Farm Bureau scheduled for last Tuesday, was postponed until some date to be announced later.

Tennis Balls Fly At Kanola Hall

Bing! Bang! Spring is here! Because of tennis balls on the second floor!

The new announcement in Kanola is window tennis, played without courts, with no bounds but the window and walls. Those who are already elimin- ated from the big tournament are Margaret Benjoures for knocking on a light globe; Vera May Jennings for being too late half hour late. The finals will be played some evening this week with Laura, Lois, Blanche, Vera, Betty and Thelma. After waiting to enter the contest apply in room 15. A great deal of talent has been shown in tournaments and receipts from the sale of tickets are mounting rapidly. There are some new rules and a few of this new type of game.

In the first place, the weather makes no difference—the game may be played in rain or snow. Besides it may be played in the evening after all the authorities are asleep.

Leonard Selects Five Chemists

(Continued From Page One)

I executed during the reign of Joseph Priestley (English, 1733-1804), philosopher and chemist, noted for his study of microbes and the tendency of plants to purify air, discovered oxygen. Henry Cavendish (English, 1731-1819), natural philosopher and chemist, discovered the distinctive properties of nitrogen, determined the composition of water. Louis Pasteur (French, 1822-1895), chemist and biologist, famous for his study of microbes and fermentations. He was a man who brought chemistry and medicine together.

Joseph Guy Lavoisier (French, 1748-1804), natural philosopher and chemist, is known for his work on magnetic force, ascended 2400 feet in order to ascertain the intensity of magnetism, discovered cyanogen.

Two other famous chemists mentioned were Dmitri Mendeleef, formulator of the periodic law, and Dalton, one of the atomic theories, which marked an epoch in the history of chemistry.

Seniors Hold Colonial Ball

(Continued From Page One)

ed moon hung in the end of the ball- room.

Hosts guests were Mr. and Mrs. W. T. Stephens, Mr. and Mrs. Howard Porter, Lester Screp and Marion Hopper. The decorations were: Marian Hopper and Adolph Lindley, Lester Screp and Marion Hopper, Margaret McDonald and Alna Mitchell, hall and music, Helen Groe- she, Phoebe of the house and very remote ancestors, who also lived in fire-proof homes.

And well as the girl was expected.
