Ice T talks, shares history

Rapper and ‘Cop Killer’ speaks to campus

by Al Harrison
Staff reporter

Ice T, who grew up in a Los Angeles gang, spoke at McConnell Auditorium Tuesday night. He outlined his personal growth while describing his life, beginning with the death of his parents and how he moved in the seventh grade from New Jersey to Los Angeles to live with an aunt.

The gang life he discovered in Los Angeles offered something which home life did not, he said. "The first place I heard somebody say 'love' was in a gang," he said. "It's not something to be proud of, but it's something that I got into looking for a friend.

At that time, gangs weren't as violent as they are now. Gangs were just some guys you hung out with. If you take violence away from the streets, you have a club. There wasn't anything more than going to a party and staring off into the distance.

When he became a father at 17, he said, 'The first thing I heard somebody yellin' out your name so everybody knew you guys won. People really weren't dying like they are now.

The most unmerciful murderer. To get the most stripes at the end of your body. The most unmerciful murderer. The most unmerciful murderer. When I became a father at 17, I decided on a lifestyle change and joined the United States Army.'

In the Army, his current view of the American political spectrum began to form, he said. "The military is where I learned to hate the system. The system is rotten from the core. America's streets.

When I became a father at 17, I decided on a lifestyle change and joined the United States Army. When I became a father at 17, I decided on a lifestyle change and joined the United States Army. When I became a father at 17, I decided on a lifestyle change and joined the United States Army. When I became a father at 17, I decided on a lifestyle change and joined the United States Army.

The candidates seeking BOD offices next year will run for the new positions and serve under the new constitution. Current positions held will not be changed.

All officers other than the president will now be required to spend at least 14 hours a week in the office, which is five more hours than before. The president has to spend 19 hours a week.

Salaries will also be increased from $850 a quarter for representatives to $1,300 per quarter for vice presidents.

The positions of representative for student facilities and representative for university life will be combined into the position of vice president for student life and facilities.

A new position, vice president for equity and community service, will be created, which will focus on community service and volunteer activities such as the Campus Compact and Student Equity Council.

To become effective, the positions had to be approved by both the BOD, the BCT and a special election. Three-fourths of student voter turnout from the previous BOD election was needed to vote for changes. This election took place March 11, 1993.

Kris Henry, president, said the BOD took the time after the elections until now to go over the old and new constitution, checking and itemizing each article for accuracy.

"We need to adapt to serve the student body more, and in different areas," Henry said. "I think the new constitution will work great. It will have less hierarchy, more hours for students, and we can get more stuff done.

Leslie Webb, student representative for Student Facilities, said the new changes will allow more opportunities for incoming officers.

"Students will get the chance to get more hands-on experience," Webb said. "With the new constitution, students will be able to dig into their positions more than they were allowed to before.

"A student can really go wild and build great new bridges with the community."
Washington Student Lobby does more than take your dollar

WSL recently awarded chapter status and office space to increase student voice in Olympia

by Tim Yeaton
Staff reporter

The Washington Student Lobby has opened a chapter office at Central which will assist students in gaining a voice in the legislative process in Olympia.

Located in Room 218 of the Samuelsom Union Building, directly across from Student Activities, the WSL office is primarily funded by the contributions of students who give $1 each quarter directly across from Student Activities, the WSL office is primarily funded by the contributions of students who give $1 each quarter.

“WSL is a statewide organization designed to inform students of pending legislation affecting higher education. Before each legislative session, WSL delegates from the University of Washington, Washington State University, Western Washington University, Eastern Washington University and Central gather at a state meeting in Olympia to present the agenda for each school.”

WSL then brings each agenda to the legislative session via a liaison selected by each school’s delegation. Heather Flodstrom, a senior, is currently Central’s student liaison in Olympia.

WSL has existed in the past at Central, but it has not been an organized and recognized chapter, or a separate office location, Olsen said.

“Students may also come in and use the office as a way to tell us what they think.”

“It’s a two-way street,” he said. WSL invites any student to come and get involved.

Many people would be surprised at how much goes on in Olympia that students never hear about, Olsen said.

“If people come to the chapter meeting we will inform them of some controversial bills from this session,” he said.

Olsen described current House Bill 2773, a bill that, if it had passed, would have allowed universities to employ students at 85 percent of minimum wage under certain conditions, as an example of what WSL lobbies for.

“We are here to fight for students’ rights,” Olsen said. “Not every student has the time to do these things.”

The next WSL meeting is today at 3 p.m. in SUB 208.

Freshman takes life over weekend

Friends recall the warmth and caring of 19-year-old

As you entered the doors of Wilson Hall, you would be greeted by a smiling, carefree young man who's obvious concern for you would come through.

As he adjusted his Red Sox cap, he would look straight in the eyes and automatically knew that it was genuine sincerity.

This was our best friend David McLendon.

Those of us who knew him felt privileged to have had him touch our lives. His devotion to his friends and the unfailingly nature he possessed has created the biggest question in our lives:

Why?

Although we don't know why he did what he did, we know that we loved him and, for us, David will always be here.

As we walk by the room where he played his favorite game, an empty chair remains.

For us the game of Civilization has ended.

Student minority clubs unite for more support and political clout

by Anthony Costanti
Staff reporter

A new minority student coalition was granted office space in the Samuelsen Union Building by the Union Board at the beginning of this quarter, which will allow them greater support and political power.

The Samuelsen Union Board allocated the space to the coalition, which includes the Black Student Union, Movimiento Estudiantil Chicano de Aztlán, the Asian Pacific Islander Student Union and the Native American Council.

Robert Green, former president of BSU, presented the idea for the coalition at the SUB Union Board meeting Jan. 10. The motion was approved.

"There is a need for minority students to work together and to be more recognized on campus," Green said.

"Because minority issues are not always raised on campus, it helps when all groups can come together to promote all the groups issues collectively, and they're coming together give them more power to be heard," he said.

The Minority Coalition was formed to promote minority causes and help the clubs to interact more and support each other. The room is designated for their use for the next two years.

At the end of this period, the Union Board will have a meeting with the group to decide if there is still justification in continuing to allocate them the space.

John Driskell, director of Student Activities, said, "Student Activities supports this idea, and sees it as an opportunity to work together, give them more power to be heard," he said.

The Union Board made a wise decision in allocating the space to under-represented groups so they can start filtering into the mainstream of student life on campus," Webb said.

The Minority Coalition was presented the idea for the coalition at the SUB Union Board meeting Jan. 10. The motion was approved. The motion was approved.

Webb also said the coalition is not exclusive in containing the four clubs, and other minority clubs on campus are welcome to join.

She said the coalition is mainly for support, and each club still gets its own funds from Student Senate.

LIFE: less menacing and more personable

From LIFE page 1

$250 check from his father's Social Security as his only income. He found he could supplement his income by stealing a car stereo now and then. Then he joined the Army, "I was the guy who carried the gun," so I always heard it when the Pentagon would call up and order troops to do things like take a hill and draw enemy fire," Ice T, who was a Ranger, said. "That means you are ordered to climb a hill in order to get shot at."

When he returned from the Army, his small time criminal friends hit the big time: insurance fraud, robbery, burglary, credit card fraud.

He never intended on making crime his occupation. During the period when he was committing crimes, he was a disc jockey making a name for himself by rhyming along with music he played at clubs.

"I define racism by: Do you feel culture by enlightening their own people?" "All I have is hope," he said. "You ever watched wrestling? That arena is packed to the top, everyone a**hole, until someone a**hole came along and told one of 'em they were better than the other," he said.

Ice T encouraged the audience to help breed racism out of American culture by enlightening their own children.

"It's never gonna end in our lifetime, but we're gonna have children. The question is: do we pass the baton of hate or the baton of understanding?"

Education is the key to providing hope and opportunity, he said. "Basically, I believe we should take all the money we're spending on law enforcement and spend it on schools," he said.

"With the money they spend to build a prison, you could build three inner-city schools from the ground up with marble floors and computers in every room. Let's install some hope in people.

"All Have it," he said. "You take hope away from me and all I got is a gun on the roof with a high-powered rifle."

KILLER: Rapper believes education can provide hope

From KILLER page 1

glamorizes violence stem from the Body Count song, "Cop Killer," he said.

"They [the police] found this record. They held it up to America and said Ice T is the enemy. The American public said, yes, he's the problem.

"The problem wasn't killing cops, the problem was the cops were hurting people.

While he denied hatred for the police in general, he said law enforcement is one of many government systems which has been inflitrated by corruption.

"Basically, America is dumb, dirt dumb," he said. "Let me explain ... You ever watched wrestling? That arena is packed to the top, these same people vote," he said.

"We could probably run f***ing a whole family, until someone a**hole came along and told one of 'em they were better than the other," he said.

"Our education system is the key to providing hope and opportunity, he said.

"Basically, I believe we should take all the money we're spending on law enforcement and spend it on schools," he said.

"With the money they spend to build a prison, you could build three inner-city schools from the ground up with marble floors and computers in every room. Let's install some hope in people.

**First-ever Mr. Central to be chosen tonight**

**by Tim Yeadon**

**Staff reporter**

It may not be pretty, but Central's Residence Hall Council is proud to present the first-ever Mr. Central contest. Mr. Central will take place tonight in the Samuelson Union Building South Cafeteria at 7:30. Tickets at the door will be $3.

Eleven men from Central's residence halls will go head-to-head through a four-round competition which gives the contestants an opportunity to show why they deserve the title of Mr. Central. The men will be asked to display their greatest talent, model sportswear, show their charm and cunniong in an ensemble of evening attire, and, to top it off, they will be forced to exhibit their mental powers in an impromptu question and answer session with a panel of judges.

The panel will consist of many people from the university community, including three members of the Associated Students of Central's Board of Directors.

Kris Henry, president, Shannon Cutler, executive vice president and Denise Stagg, representative for University Life, will all be panelists.

David Dick, 19, a freshman and the candidate from Hitchcock Hall, said the competition is just like a male Ms. America, except it's at Central.

Various local businesses have offered to donate prizes for contestants, including membership to a local health club for the first place winner. Shannon Sylvestre, chair of the Mr. Central committee, said she thinks the contest idea is fun.

Sylvestre, 19, said Mr. Central was once attempted at Western Washington University.

"That's where we originally got the idea," she said. "It's all in fun."

Not everyone on campus shares her views, however.

John Brangwin, student representative for Academic Affairs, and Shawn Christie, vice president for Organizational Affairs, voiced concerns at the Jan. 11 Board of Directors meeting over possible gender specificity in the competition.

RHC representatives at the meeting said they had no intention of offending anyone and they just wanted to create a fun event.

"Those contestants in the competition weren't pushed into it," Sylvestre said. "It is purely voluntary."

Dick agreed with Sylvestre, and said he doesn't care if he even wins.

"It's just an honor to be there," said Dick.

Though there are 17 residence halls on campus, only 11 halls were able to field candidates. Contests were chosen in different ways, some by group consensus.

Meisner Hall picked Derek Tisdal after a questionnaire was passed around by the hall's living group advisors.

"I'm going to be lip-synching 'The Devil Went Down To Georgia,'" Tisdal said. "But, I don't think I'm going to win."

Chris "Wally" Walla, the Sparks Hall candidate, thinks he has a chance of winning.

"They couldn't get anyone else to be in the competition, so I'm kind of Mr. Sparks by default," Walla said.

Walla describes himself as a "lowly freshman resident" who sees the competition as his chance to shine. He plans to sing a song while playing the guitar.

"I'll probably make an idiot of myself, but I think that's good every once in a while," Walla said.

And what will Walla do if he actually wins?

"I'll go on a world tour," Walla said.

Watch your wallets, wheels and wagons

Teapots, transports and traffic tickets do not tire officers

This was another busy three-day weekend for Public Safety and Police Services.

• Early Sunday morning while on patrol by Dean Hall, officers noticed a man near some bushes. They approached the man and realized he was urinating in the bushes. He was contacted, warned about disorderly conduct, and released.

• A resident of Brooklane Village contacted officers Feb. 16 to report the theft of a child's red wagon. The wagon, valued at $50, was taken from the front porch sometime that afternoon. Officers are continuing the investigation.

• The Ellensburg Fire Department and campus police were called to the Wahle Apartments Feb. 15 for a possible fire. Apparently, a resident left a teapot unattended on the stove. Officers entered and found lots of smoke but no actual fire. They discovered minor damage to the stove and a melted teapot. Written warnings to two residents of Moore Hall.

• A resident of Carmony-Munro Hall called officers Thursday morning to report possible vandalism to an unoccupied room. Officers could not find any signs of forced entry. They discovered the mattress was missing, which is approximately a $150 loss. The mirror was also broken, which is a $50 loss. An investigation is continuing.

• A resident of Carmony-Munro Hall called officers to say he accidently broke his window the night of Feb. 16. Housing Maintenance was called to repair it.

• Officers had three reports of slashed tires Friday afternoon. A resident of Alford-Montgomery Hall said all four tires on his car were slashed the previous night. The car was parked in the T-22 lot. Damage was estimated at $800.

• A Barto Hall resident said all four tires on their car parked in the N-19 lot were slashed. Damage was estimated at $400.

• A resident of Carmony-Munro Hall called officers Thursday to report the theft of approximately $70 in cash from his room the night before. He said he left the room for awhile. When he returned, he discovered the money in his wallet was missing. The door to his room was closed but unlocked.

• A resident of Alford-Montgomery Hall called officers Thursday to report the theft of approximately $25 from his wallet. Another resident said his wallet, valued at $30, was taken from the gym. Police are continuing the investigation and anyone with any information should contact Public Safety and Police Services at 960-2958.

• Friday, a 20-year-old man was cited for driving on the service drive by Quigley Hall without a permit. Saturday night, a 22-year-old woman received a ticket for driving with an expired license. She was stopped on D Street. The same night, a 43-year-old man on Eighth Avenue was cited for having an expired license. Saturday afternoon, two 16-year-old boys were cited for failing to wear seat belts on East Eighth Avenue.

• Officers investigated a two-vehicle accident Thursday in the Q-14 lot. One vehicle backing up hit another car moving west. There were no injuries. One car sustained $2,000 and the other sustained $2,500 in damage.

To the Editor:

I have a few comments for people who have misconceptions about the Mr. Central contest.

First, the contestants in it chose to be of their own will and were not pressured to do anything. Central is not the first college to host this kind of event; Western also has a comparable event. If people think Mr. Central is sexist then I take it they see it the same way as the protesters they are getting.

The theme to Mr. Central is sports. See you there.
Listening precedes judgment

From LISTEN/page 6

"Boyz 'n the Hood," Ice T presents a very honest picture of the cruel, violent world in which he has grown up and lived in down in south central Los Angeles. I'm sure he and many others from that area would like to "respect authority," but as we all found out from the Rodney King beatings, sometimes the "unlawful violence" is perpetuated by the authorities. Contrary to popular belief, Ice T encourages young kids to break the vicious cycle of ghetto life and get out. Why can't they, such as he does in his rap, "Escape From the Killing Fields."

The second thing that bothered me about this letter was it was written before they even had the chance to hear the two speakers, so I have taken the time to listen to them. My advice to everyone here at Central is to listen to all the speakers on this campus and take the time to educate yourself on the issues that affect us before forming opinions about them, and especially before putting those opinions to print.

Answer People present Brady Bunch theories

Dear Answer People: Maybe you guys can help me. The other day someone offered me my choice of having an elephant as a pet in my backyard (if it will help, it was an African elephant) and all the hay it can eat, or eating Slash from Guns 'n Roses as my best friend. What should I do? Help me!

-Jen. O.

A. Well, does Slash come with a piano to jump on? Jen, it sounds like you have a problem. Rule one, we believe you really know the answer if you just listen to yourself. Take a few hours each day, stare at a blank wall, and really focus in on yourself and the two choices. In a few weeks, the real opportunity will shine. Take it girl! And, whichever you finally don't decide on, be sure to send it our way.

Dear Answer People: Hey, why didn't we see the kids on the Brady Bunch ever playing in their front yard?

-H. Moon.

A. We believe it was because they were not allowed to. The real question is why? We believe the front yard contained the body of Shemp Brady, an older brother who was killed mysteriously (some say it was Sam the meat man, some say it was a jealous Marsha), and whose murder has gone unsolved. The second theory is more simple. If you grew up in south central Los Angeles, would you let your kids run free in the front yard? The Answer People request your questions.
What Can You Get With A Dollar?

Welcome to this snapshot of the CWU School of Professional Studies.

Our school—also known as SPS—is comprised of a diverse aggregate of academic disciplines, most of which are targeted either at specific career choices or at further academic study upon graduation from Central Washington University. The school recognizes, however, that professional preparation entails much more than specialized "training" or "education." In addition, professional preparation students also must focus on the development of rational leadership which enables one to adapt and contribute meaningfully to the present and the future.

Our school mission, which is the basis for all our programs, summarizes our commitment thus:

"The mission of the School of Professional Studies is to prepare enlightened leaders for the professions and for society; leaders who will contribute to and influence their respective professions; leaders who will commit themselves to socially responsible citizenship in a global society."

The students and faculty of the School of Professional Studies have prepared this newspaper with the hope that you will find it helpful in your career development. For more information, call the School of Professional Studies, 963-1411.

**Delta Epsilon Chi: new face, familiar role**

Emphasizing the importance of values outside the classroom is the role of Delta Epsilon Chi, a newcomer to the CWU campus. Delta Epsilon Chi, a national student organization, provides students with an opportunity to practice leadership skills in their own peer group. Furthermore, the organization is designed to nurture those skills needed in the competitive world of today.

Those skills are two-dimensional, covering both social and professional.

Dobbyn, nominated intern of the year for Penney’s Intern of the Year Awards for her work during the summer of 1993.

Emphasizing the importance of interpersonal skills, Dobbyn, District Personnel Manager. "The internship program is vital to our company and continued, successful future growth. The internship program is a major recruiting source of our company’s management trainee program."
Central’s paramedic program focuses on patients, quality

The main goal of the CWU paramedic program is to train the best paramedics, with the best staff, for the single most important purpose—to serve the patient. The paramedic program began in 1973 as a three-year pilot program sponsored by the Emergency Division of the Washington State Department of Social and Health Services.

Two general principals of the program are to impart: 1) sufficient knowledge and skills to carry on life support in the field, even if telecommunication is impossible, and 2) and that this knowledge and skills should be geared to the special constraints of care in the field. To fulfill these principals the program has a rigorous 60 credit major curriculum with a course of study that provides education and experience.

A paramedic student must have 80 hours of “hands on” time on the ambulance in addition to the 164 hours in hospital experience, including OR, OB, Pharmacology, ICU, hyperbaric Catheter, ER, IV and Intubation.

Through this patient oriented approach, graduates are well prepared to meet the increasing demands on today’s emergency practitioners.

CWU graduates have primarily gone on to work at such agencies as Walla Walla, Kennewick, Yakima, Elkhart, and Vancouver, Washington.

PEHLS combines academics with experience

Leisure services graduates hold prominent positions

A large number of CWU leisure services graduates are employed in professional administrative, managerial and supervisory positions. Although the traditional focus of employment in city parks and recreation departments and voluntary agencies still provide careers for leisure services graduates, the field has undergone a dramatic change in the last decade.

Many of today’s students choose careers in outdoor recreation and commercial recreation. Older graduates can remember when the thrust of the program’s curriculum was largely on the preparation for leadership roles.... but today’s career leisure services professionals are college prepared managers.

Today’s graduate is expected to enter the profession with the technical skills and business acumen to quickly and efficiently manage an agency or business of the type in which he or she hopes to begin a career.

Internships: experience is often the best teacher

Each recipient of the B.S. in leisure services completes a minimum of 360 contact hours of internship with an agency or business of the type in which he or she plans to work. Internships are a students’ educational experience to prepare them for their future careers.

Leisure services programs provide theory, technique

Fitness, sport management provides theory, technique

The Central Washington University Fitness Center is the most comprehensive health education program in the region. The Center provides its members with current theories in exercise management and techniques and offers courses in a variety of areas including practical experience for the professional necessary to conduct fitness/wellness programs in public and private agencies.

Students find experiences in fitness, sport management, sport recreation and administration and to programs. The curriculum encompasses up-to-date knowledge regarding fitness, sport, nutrition, assessment, prescription and implementation in a healthy lifestyle.

Students graduating with a B.S. degree in Physical Education with a specialization in Fitness and Sport Management also face the challenge of preparing for careers in corporate-wellness programs, medical fitness centers, geriatric fitness-wellness centers, private clubs, gyms, spas, and government agencies.

Many graduates have secured positions in the fitness industry. David Bannish, a graduate of the 1983 class of CWU’s health education program, is the director of fitness and wellness at Yakima High School. Latitude Sports, Coordinator and Dr. Jerry Findley (class of 1973) University Supervisor, have also been successful in their careers. Students graduating with a B.S. in leisure services programs have received CWU’s internship in the leisure services program.

Master’s degree in PEHLS enables goal achievement

Need a higher level degree to achieve that job you want? Desire accelerated salary adjustments by moving into the next qualifications brackets? Seeking a higher level of learning in order to make more informed, justified, professional decisions? Consider the master of science degree in PEHLS where a quality education is provided to individuals whose career aspirations lie in the areas of human movement, (science of coaching and human performance), wellness and health promotion, health and physical education in public schools and leisure services.

Many graduates of the MS:PEHLS program have continued on to study at the doctoral level. Acceptance has been gained at such notable institutions as the University of Oregon, Penn State University, University of South Carolina, Oregon State University, Southern Illinois University, University of Utah, even the University of Wollongong in Australia.

The MS:PEHLS program has an excellent record for placement of graduates into doctoral programs. Some of the recent successful stories include Dr. Geoff Davidson, Dr. Groone Maas, Dr. Kevin Taylor and Dr. Andrew Jenkins. Future doctors include Julie Mattison, Eric Rosegard, Tim Runham, Neil Romney and Tamara Snyder.

For most, public school teaching is the career of choice. A majority of the MS:PEHLS graduates return to teaching in the public schools where they have the ability to make more informed decisions because of their enhanced knowledge. Not surprisingly, they also qualify for enhanced pay, benefits and retirement packages to the baccalaureate peers with the cost of pursuing graduate studies returned manyfold over their career life.

As well, the department offers a summer sequence of courses that enables the graduate student to complete this higher degree while still teaching during the academic year. This option is quite popular for full-time teachers.

Financial assistance is provided to qualified full-time students in the form of graduate teaching assistantships. Such awards are available on a competitive basis to all fully admitted students. Here, students gain greater insight to the instructional process by teaching in undergraduate professional preparation and laboratory classes, assisting in research project, and providing instruction in activity courses.

Want to become an ESL teacher? Minors, endorsements offered

1. General Information

Are you interested in teaching students whose first or dominant language is other than English? Does having access to another culture through your classroom teaching interest you? Would you like to make a real difference in students’ lives? If so, then the Bilingual Education/TESL or the TESL minors and endorsements are offered for you.

The Bilingual Education/TESL combined minor and endorsements requires proficiency in both Spanish and English. In Central Washington, there is an overwhelming need at all grade levels for teachers who are proficient in Spanish and who are prepared to teach the language to minority children.

The TESL minor and endorsement requires proficiency in a language other than English, although such proficiency is very desirable. The program serves the needs of teachers who may work in classroom rooms in which students from language backgrounds other than or in addition to Spanish are also enrolled.

Both programs offer K-12 endorsement.

In addition, either minor may be of use to people planning to teach non-English-speaking students in settings other than the public schools (including other countries), and can thus be taken as a complement to any major the student chooses. For further information, contact: Bilingual Education and TESL Programs Department of Education Central Washington University Ellensburg, WA. 98926 Tel. (509) 963-1461

2. Summer, 1994 Information

Summer Offerings

First Session, June 20 - July 20
Ed. 438 Teaching English as a Second Language. (3 cr.) D. Otto
Ed. 439 Testing English as a Second Language. (2 cr.) D. Otto
Ed. 440 Reeding English as a Second Language. (3 cr.) J. Licano-Palma Six-Week Session, June 27 - August 5
Ed. 507 Studies and Problems in Intercultural Education. (3 cr.) A. Bowman
Second Session, July 21 - August 19
Ed. 431, Intercultural Education. (3 cr.) J. Licano-Palma

One in seven employed in tourism

Over 60 Leisure Services students are currently employed in the growing tourism management industry.

Currently, one in seven persons in the world are employed in travel and tourism positions. The tourism industry is projected to be the largest industry in the world by the year 2000. Tourism, a growing sector of the Washington state economy, offers many career opportunities for college graduates.

The four year old tourism management emphasis area in the Leisure Services Program offers 10 elective course which allows the student to choose classes that best suit their career interests. The students are provided with an overview of the sector including other countries, and can thus be taken as a complement to any major the student chooses. For further information, contact: Bilingual Education and TESL Programs Department of Education Central Washington University Ellensburg, WA. 98926 Tel. (509) 963-1461

PEHLS scholarships

Comprehensive Health Education Foundation each year offers two $3000 scholarships for health education majors.

Each year several scholarship opportunities are available for outstanding students majoring in physical education.

Of special note are the two $1500 Beth Kohler-Bardwell Scholarships awarded to women

Get two for one

Interested in a career in business and want to teach too?

Marketing education is your answer! M.B.A. has a strong marketing and retail-related curriculum yet provides an opportunity to be certified as a high school marketing teacher-coordinator and DECA advisor. Upon graduation, marketing education students have qualified for positions in the retail community, public schools, direct sales, community college teaching, and other business-related occupations. If you want to get TWO FOR ONE contact the Department of Business to obtain course selection and administrative and management guidance.

The club is also planning trips to other parts of the state who are interested in the field of technology. They are able to enjoy such classics as the space shuttle Challenger, hydraulics and pneumatics trainer and the MRD System, and our on-site roof-top Rocket Shoot. 

3. Students in the Metalurgy/Materials Technology course and some of the firms that have been involved with the class are: Boeing, Stow Bin Hinge Design; Honeymoon, epoxy resin, fiber glass fabric. There is a contest and a presentation that demonstrate the concepts of electric motor torque, speed, horsepower and related electrical concepts.

4. Bill Rakes, a professor of industrial arts at CWU, had his own show of iron craft at the Clymer Western Museum in Ellensburg. His design was shown throughout the museum, and by the early days in Norway where he had learned the art of iron craft.

5. Thirty MESA students enjoyed a 2-day conference and a learning event in the power technology lab. MESA is a high school program for 2 and 3 dimensional students.

6. Vocational Teacher Education

7. Professors Bob Beed and Bob Hunter have completed their third year of the Master in Science Technology training at CWU. Teacher education is a serious training from a variety of industrial experts but also about 3 years of literature and curriculum research.

8. Students Bob McGowan and Joe Bonebrake, along with math, science, technology and society professors at CWU, conducted a new program called "Expanding Your Horizons." This program has been developed and coordinated by staff at Mills College in Oakland, CA, and is a program for middle school and high school girls to learn about the world of careers involving mathematics, engineering and science.

9. Colby Africa, a very capable high school student at the Delphian School, has spent a year with Bob W. in the Power Technology Lab as part of a "Practical Week" for all Delphian students. When in school at Delphian, Colby is manager of the electronics department active in design and development of software and computer programs. While at CWU, he is an intern in design, development and electronic systems and robotic demonstrations for Davis High School, White Swan, D.A., and Martin Luther Elementary students in Yakima.

Teachers should consider giving Bob W. a call and setting up a short tour, hands-on hour, or even a field experience for students for a full day.

10. FAA support for the Flight Technology program at CWU continues to thrive with an increase of flight and ground school girls to learn about the world of careers involving mathematics, engineering and science.

We have had 6 entries place in the state competition, student category, and two of them have been awarded grand prizes. Carolyn Schacter, your professor, has placed in the family category every year for the past three years.

Come to Michealson Hall Room 210 to check out our labs, we have the best lab layout in the nation. See what we do and meet our students. It will be well worth your while.
The "Boardroom," a BEAM classroom so nicknamed because of its unique design. Faculty members are having interesting discussions about "what gets to use it?"
School of Professional Studies, Study section
Classroom theory, workplace reality:
Interns learn about real world of employment

The summer of 1993 provided an opportunity for students to gain hands-on experi-
ences to help a diversity of students learn about the requirements of the real world of work.

The retail management and fashion merchandising students saw their coursework come to life as they worked in retail for the summer. The experience was a once-in-a-lifetime opportunity for most of the 4,506 students who participated in the program, which is now more than 50 years old. (Current Bureau of Labor Statistics data)

The camp program was developed in the summer of 1974 by Steve Hall, a Washington University graduate student from the School of Business, to work with 30 elementary and middle school students. The summer camp program has continued to grow, with an estimated 5,100 students participating in the program in 2014.

The camp program is sponsored by the Washington University Career Services Office and is designed to provide opportunities for students to gain hands-on experience in career-related fields. Students work in a variety of settings, including retail, hospitality, and healthcare, to develop skills and gain exposure to different industries.

During the summer, the Career Services Office offers a variety of resources and services to help students prepare for their careers, including resume and cover letter writing workshops, job search strategies, and mock interviews.

Retail opportunities to increase

In the next 15 years employment opportunities for retail management and fashion merchandising graduates will increase from 619,000 employees to 4,506,000. (Current Bureau of Labor Statistics data)

In an increasingly competitive employment market, those with additional skills will continue to have the most opportunities. This includes those who are interested in managing a business in addition to working in the field.

The success of the Retail Management and Fashion Merchandising program is attributed to the number of managers and supervisors who have been employed by the program, which is now more than 50 years old.

Leisure services students run camp

Every spring 100 honor students from Ellensburg’s Morgan Middle School in Washington make the trip to the West Campus to participate in the Summer Leadership Program, which is planned and presented by Central Washington University students from the Leisure Services program.

The camp program was developed eleven years ago by Steve Hall, a Washington University graduate student from the School of Business, to work with 30 elementary and middle school students. The summer camp program has continued to grow, with an estimated 5,100 students participating in the program in 2014.

The camp program is sponsored by the Washington University Career Services Office and is designed to provide opportunities for students to gain hands-on experience in career-related fields. The majority of career fields open for Air Force ROTC. Universities that are members of the program are listed below, excluding pilot, navigator, medical, biomedical, or legal fields. Those under Technical Category require more interest in the specific area. Those under Nontechnical Category have no specific degree requirement, though certain academic background is sometimes recommended. The course work is specific course requirements.

Technical Category
- Acquiring System Management
  Behavioral Scientist
- Civil Engineering
  - Architectural Engineering
  - Electrical Engineering
- General Engineering
- Industrial Engineering
- Mechanical Engineering
- Communications-Computer Systems
  - Programming and Analyses

Non-Technical Category
- Accounting
- Auditor
- Budget
- Cost Analysis
- Acquisition Contracting
- Manufacturing Engineering
- Production Manufacturing
- Air Traffic Control
- Air Weapons Control
- Aircraft Maintenance and Munitions
- Aerospace Engineering
- Structural Engineering

There is a professional organization available: Arnold Air Society. It is affiliated with the Air Force Association.

The Arnold Air Society is a non-
formal, non-profit, non-fraternal organization noted at CWU for its quarterly management of the American Red Cross.

Awards include the Chairman's Choice Cup
and monthly Kittitas County Food & Cheese.

Children's voices echo out of the wall of windows to the outside play area, a little girl is watching the two new goldfish swim in a glass bowl, and a teacher is sharing a sardine snack with a boy at the low table. These are a few of the developing children alternative leadership and socialization programs and social functions. Currently the program at CWU has 100% job placement. Graduates can expect to find management positions in a variety of businesses ranging from construction, insurance, industry and environmental fields.

For more information contact Richard Thody at 973-6346 or Barb Korschner at 973-3204.

The Flight Technology program, under Industrial Engineering Technology, is relocating to Bowers Field, Ellensburg, Washington 98926-7510. For program information write to Fred Abed, Chair, Department of Education, Central Washington University, Ellensburg, Washington 98926-7510.

The grant was written by Dr. Robert M. Envick and awarded to Central Washington University, 203, Ellensburg, WA 98926-7568. For information, call the Office of the Dean of the College at (509) 963-2314.
US ARMY ROTC
CENTRAL WASHINGTON UNIVERSITY
ALL MAJORS: GUARANTEED FOR "HIRE"

IN SCHOOL YOU GET TRAINING IN:
- LEADERSHIP
- MANAGEMENT
- DECISION MAKING
- PROBLEM SOLVING
- PHYSICAL CONDITIONING
- TIME-MANAGEMENT

AFTER SCHOOL
YOU GET:
- PAY—OVER $24,000 TO START
- FULL MEDICAL/DENTAL BENEFITS
- WORLD WIDE TRAVEL
- OPPORTUNITY FOR FURTHER EDUCATION
- IMMENSE JOB SATISFACTION

WHAT CORPORATE EXECS HAVE TO SAY

"A combination of college education and officer training is an ideal preparation for many jobs in business and industry. ROTC involves the training of leadership, discipline and imagination that can be invaluable through one's life."
—Rand V. Araskog, Chairman and Chief Executive, ITT Corporation

"Poise and confidence come with experience in leadership positions. ROTC has proven to be an excellent environment in which to generate the ability to make sound decisions relating to given situations. Industry, and business, and indeed, all walks of life require and reward those who can analyze, appraise and then commit available resources to achieve defined goals."
—Fred W. O'Green, Chairman, Executive Committee, Litton Industries, Inc.

Climb higher, faster in Air Force ROTC.
Phase II dance team shows energy

By Jennifer Thompson
Staff reporter

The crowd began to cheer as the
dancers took their positions.
Techno-music blared and the
dancing began.
The audience's enthusiasm in­
creased as the Phase II dance team
energetically moved across the gym
floor.
Phase II has been a recognized
club for three years.
The club started when Central
students saw a need for a dance
team. Students posted fliers an­
nouncing the team and held audi­
tions.
The team had 26 members its first
year.
Last year the team had 16 mem­
bers and this year there are 10.
Phase II works well with less
people because the team looks more
unified, the dancers said. It's also
easier to coordinate the team when
there are less members.
The Phase II members are all
women.
"My only women tried out (this
year)," said Lachandra Carter, a
junior leisure service major and
dance team member.
However, one man tried out the
first year the team formed, said
junior Lynette Lambert, a dance
team member who is combining
biology and psychology into one
major.
Phase II encourages both men and
women to try out for the team.

During tryouts, students first learn
dance and then perform that dance
in front of judges. Lambert said.
The judges consist of faculty
members and cheerleading
coaches. Lambert said.
Students who make it past the
first round of judging have to per­
form an original dance in front of
the same judges. Lambert said.
Tryouts for the dance team are
usually held during the first few
weeks of spring quarter. Carter said.
The dancers perform during home
football and basketball games.
The team also performed at the
fitness fair yesterday in the
Samuelson Union Building and
will perform this spring at Ellensburg
High School.
Phase II practices three days a
week for one to one and a half
hours a day. The practice schedule
typically increases to five days a week
the week prior to a performance.
The Phase II dancers have vari­
ous reasons for joining the team. "I
tried out for the team because I love
to dance and it is my last chance to
perform before leaving college," said
Tonya Etscheid, a junior education
major.
Deanne Galassi, a junior health
and fitness major, joined the Phase
II team because she enjoys per­
forming.
"I joined Phase II because I enjoy
dancing," she said. "I cheered last
year and it was more technical.
Phase II is more free."
While the team doesn't have a
specific profile for its dancers, the
dancers have certain qualities in
common, Carter said.
Dancers need to have determina­
tion, she said.
They must also have an ability to
work with others, she said.

"Grapes of Wrath” portrays sadness

by Anne Malott
Staff reporter

Theater arts has existed through­
out history to entertain and engage
an audience's emotions while al­
lowing it to temporarily forget its
own lives and ailments.
The "Grapes of Wrath" succeeded
in this task.
The audience followed the Joad
family as it left the Oklahoma dust
bowl of the dark Depression and
headed west to reach the promised
land of California.
A somewhat reluctant group of
farmers and workers turned from
the "sky" and at varying stages in
the lunar cycle.
Setting aside their own needs, the
family was able to give some relief
to the ailing elder.
The stage props and lighting are
also well done.
The main prop, a converted 1928
Dodge truck, resembled the auto­
mobiles used by families seeking
refuge from the depression by head­
ing to California fruit farms.
The farmhouses, tents, wire fences
and other props were equally im­
pressive and added a sense of au­
thenticity to the production.
The background screen also ef­
fectively created the atmosphere
for each scene.
Clouds, stars and the moon ap­
peared during night scenes.
It was interesting to watch the
moon appear at different areas in
the "sky" and at varying stages in
the lunar cycle.
Considerable effort was undoubt­
edly expended on the "Grapes of
Wrath," resulting in strong perfor­
manccs and sturdy props.
This play is one of the best Cen­
tral productions and should not be missed.
The "Grapes of Wrath" outstand­
ing cast consists of the following:
Grandpa Joad was played by Milo
Smith, an Ellensburg resident.
Ma Joad was played by dude
Hatten, a professional actor from
Ellensburg.
Pa Joad was played by Jerry
Baugh, a professional actor from
Portland, Ore.
Tom Joad is played by Toby
Dycus and Jim Casey was played
by Craig Zagurski.
Both Dycus and Zagurski are
Central students.
Uncle John Joad was played by
Jerry Hogan, an Ellensburg resident.
Grama Joad was played by
Helen Smith, an Ellensburg resi­
dent.
Noah Joad was played by Seth
Mullinex, a Central student.
Ruthie Joad and Winfield Joad
were played by Raina Willette and
Martin Hogan, respectively.
Willette and Hogan are both from
Ellensburg.
Rose of Sharon Joad and Connie
Rivers Joad were played by Central
students Leslie J. Webb and David
Candy, respectively.
The production of the "Grapes of
Wrath" features the combined tal­
ents of regional and community
actors, working professionals and
Central students, according to the
play's program.
The play was adapted by Frank
Galtti and the original music and
arrangements were by Michael
Smith.
The play was directed by Wesley
Van Tassel, a chairman and profes­
sor of theatre arts at Central.
Future productions include the
following:
"God's Country" will be at 8 p.m.
March 10, 11 and 12 in the Tower
Theatre.
"The Elves and the Shoemaker" will
be at 2 p.m. April 23 and 24
and 7:30 p.m. April 23 at McConnell
Auditorium.
"The Misanthrope," a French
play, will be at 8 p.m. May 12,13,14,
19, 20 and 21 in the Tower Theatre.

"The Grapes of Wrath" characters use this car for refuge.
Research she started as a doctoral student at Pennsylvania State University focuses on adult ADHD sufferers, of attention deficit hyperactivity disorder, commonly called ADHD.

Hyperactivity is nothing new to Lisa Weyandt, assistant professor of psychology. Weyandt’s rigorous schedule includes publishing articles in professional journals and training psychology student counselors. She also counsels local schools about hyperactivity. Her understanding of hyperactivity comes from research and study of attention deficit hyperactivity disorder, commonly called ADHD.

What separates Weyandt from most of the research currently being done in the ADHD field is her focus on adult ADHD sufferers, researchers she started as a doctoral student at Pennsylvania State University. ADHD symptoms include irregular sleeping and eating habits, and irritability before age 7. During adolescence, many ADHD sufferers struggle with school, Weyandt said. They are eight times more likely to drop out of school and three times more likely to repeat a grade, she said.

When ADHD children become adults, they tend to have the same organizational problems. “According to most psychologists, the typical hyperactive adult has poor organizational skills, an inability to control impulses, difficulty in sustaining attention and interpersonal problems,” Weyandt said.

“All of those things are important to being successful in college,” Weyandt said. “That’s why few college students are ADHD sufferers ... most of them don’t go (to college),” she said.

Most estimates place the number of college ADHD sufferers at 5 percent, but Weyandt thinks those estimates are too low.

“They (the students) may be bright and have learned to adapt to the demands of college ...” she said. Weyandt recently administered a test she devised to 800 college students in order to determine the frequency of ADHD on campuses. The test was random and included Central students.

“I was looking for behavior that would show an inability to sustain attention, lack of inhibition and hyperactivity,” Weyandt said.

“The initial number is something like 7 percent,” Weyandt said.

“Further screening will eliminate some other learning disabilities as well as other problems,” she said. “When these things are factored out, they will reduce the percentage,” she said.

Although ADHD can be chemically treated, the treatment only lasts about four hours. After that, the symptoms return.

“There is no doubt treatment is helpful, but it is not a cure,” Weyandt said.

Although ADHD is classified as a behavioral problem in textbooks, Weyandt believes the key to understanding ADHD is in the human brain.

“People suffering from ADHD have a reduced blood flow to the frontal lobe,” Weyandt said.

This reduced blood flow could cause a reduction in concentration level and attention span, two symptoms ADHD sufferers experience, she said.

“ADHD affects about 1 in 20 kids ... that’s one kid in every classroom,” Weyandt said.

Whatever the cause or cure, Weyandt believes the large number of people suffering from ADHD need understanding and a “better fit” in society.

“The better fit,” Weyandt proposes, “could come from training, understanding and helping ADHD sufferers choose careers.”

“ADHD adults could be very productive in jobs such as public relations or photography where there are a lot of things going on,” Weyandt said. Weyandt recently received a $1,000 grant to study ADHD adults and is currently moving into the second phase of her research.

Weyandt is looking for 75 people in three categories: 25 with documented learning disabilities, 25 with documented ADHD and 25 who have no documented learning disabilities.

The project continues research that has been done on differences between ADHD sufferers and learning disabled adults. For more information, call Weyandt at 963-3688.

Love Mower provides funk beat

by Al Harrison
Staff reporter

The song “Let’s All Start a Love Thing,” off the debut compact disc “Love Mower,” by Satellite Circus is the best tune on the compact disc.

It really affected me with a happy funk beat that continued to build through the entire song.

The lyrics are also simple and fun to sing with.

The album is unique. If I gave this style of music a category, it would be folk pop.

The basic rhythms of the music are electronic by way of synthesized bass and drum machine, while the vocals and guitar complement each other.

The music’s folkish roots are apparent in the lyrics and singer’s style.

Satellite Circus’ main member is Central graduate Jay Pulliam, who is helped by other Central graduates such as Lance Gibbon, who mixed “Love Mower,” and Frank Sechberger who plays guitar on eight of the 15 songs.

On the compact disc cover, Pulliam takes credit for the arrangement of music, lyrics, vocals and “all else,” other than some guitar.

Men will really identify with the lyrics, Pulliam said.

“We hope women will like the music, too.

“I don’t understand women and that’s what the ‘Love Mower’ is; the feeling of frustration over the process of finding a good relationship,” he said jokingly.

The lyrics are clever and by far the strongest part of the album.

“Many of the songs came from true stories, although sometimes they are embellished,” Pulliam said.

He cited the song “The Bride” as an example.

The song starts off, “I never loved a girl as much as her; it really broke my heart when I got the restraining order,” Pulliam said. “Most of that song is based on true events, but I decided I really shouldn’t be so bad and kill anyone.”

Track two, “The Ugliest Girl in the World,” puts into words what many men feel and often men fear.

The song’s premise is: I’m not so shallow I won’t date a girl who is culturally unattractive (over weight, bad complexion, etc.). but what if I fall in love with her? And what if my friends think? Pulliam sensitively answers with the lyric, “Well, I guess I’m in love with the ugliest girl in the world.” “The Bride” also explores the issue of old flame getting married.

Buckle the bell up! Hock

WHAT'S HAPPENING

PLAY
• "The Grapes of Wrath," directed by Wesley Van Tassel, will play at 8 p.m. Feb. 24-26 in McConnell Auditorium.

The play exhibits the uplifting story of the Joad family, which is rooted in the life of a people, poverty during the depression.

The family travels from Oklahoma to the promised land of California in search of work and a new home.

Tickets can be purchased at the Tower Theater Box Office. Admission is $6; students and seniors are $4. Thursday performances are half price.

FILM
• "Lovers," a film directed by Vicente Aranda, will play at 7 p.m. Feb. 27 in McConnell Auditorium as part of the Classic Film Series.

"Lovers" is a film with demonstrative sexuality and Spanish overtones.

Combining black comedy and melodrama, "Lovers" is 103 minutes long and is rated R.

PROGRAMS
• "Susan B. Anthony: The Napoleonic Movement," presented by Melinda Strobel, will be from 7 to 8 p.m. Feb. 28 at the Holmes Center.

Strobel studied at the London Academy of Music and Dramatic Art and has a degree in theater from Willamette University.

She has performed in several shows both in Oregon and Atlanta, Ga.

Anthony was instrumental in shaping the political rights of American women.

• "From Lady Macbeth to Lady Hillary: A Literary Look at Where We Have Been and Where We Are Going," presented by Inga Wiehl, will be from 7 to 8 p.m. March 1 in the Grice Center.

Wiehl is an English instructor at Yakima Valley Community College.

Wiehl will examine Lady Macbeth in her role as a helmsmate and hostess, in society in which she played these roles, and the reasons Macbeth has been criticized by critics and audiences.

Wiehl will also discuss the impressions of first lady Hillary Clinton Rodham Clinton as conveyed by the press.

Tour Europe inexpensively

by Joann Horne
Staff reporter

Hitchhiking and staying in a stranger's home are a few ways Gil White traveled in Europe without spending a lot of money.

White gave a lecture Feb. 15 titled "Traveling in Europe on 84 Cents a Day," about ideas for traveling cheaply.

When White traveled to Europe, he saw 30 countries in four months and spent $1,000, he said.

White stressed the importance of keeping to a budget. If students don't restrict themselves to a budget, they will come home earlier than planned, he said.

Hitchhiking is one way to save money, White said.

"One man (who picked me up) wanted to stabilize the weight in his car going through the Austrian mountains," White said. "He made it very clear why he picked me up."

Drivers can also tell students about local places to visit, local history and places to find odd jobs, he said.

In his opinion, hitchhiking is not dangerous, White said.

"People out there are not thinking, 'The next student I see, I'm going to kill him or mug him,'" White said. "People in general do not think that way."

Another place White suggested for getting rides is gas stations, because many people stop there.

"I flew from Paris to Barcelona, 600 miles, in 10 hours by hopping from gas station to gas station," White said.

"You've got to have a sense of humor," he said. "Once you graduate and go onto your career, you will never do these things again, I promise."

Yacht hiking, swimming from yacht to yacht in an attempt to gain transportation, is another way to travel, White said.

White used this technique when he was headed from Baja Mexico, to Cabo San Lucas, Mexico.

White swam from yacht to yacht in the harbor, he said. After his third attempt, he got a ride on a yacht.

"I only four times in four months did I not get to my planned destination," White said.

"Europe is a great place to travel like this," he said.

Cycling is another travel option, White said.

"Cycling is a great way to see the countryside at your own pace," he said.

Students can go through small towns on a bicycle and get a better feel for the people, White said.

White also gave tips on saving money on accommodations.

When students get a ride from drivers, the drivers may invite the students into their homes, White said.

Otherwise, students shouldn't be afraid to ask for a place to stay, he said.

Universities are also a good place to get a room in the summer, White said.

Universities may rent a dorm room for $5 to $15 a night.

Students can also stay in a hotel.

They can approach the hotel's owner and ask to wash dishes in exchange for a bed to sleep in for the night and breakfast in the morning, White said.

This method works best in small independent hotels, because larger hotels and hotel chains may have regulations against working for a night's stay, White said.

Students traveling in the countryside can knock on a farmer's door and ask for a place to sleep, White said.

Students can show their sleeping bag so farmers know one is not necessary.

Another way to get a free bed is to stay in a police station in a town with less than 20,000 residents, White said.

In small towns, there is very little crime and often the only person locked up will be the town drunk, he said.

• "Susan B. Anthony: The Napoleonic Movement," presented by Melinda Strobel, will be from 7 to 8 p.m. Feb. 28 at the Holmes Center.

Strobel studied at the London Academy of Music and Dramatic Art and has a degree in theater from Willamette University.

She has performed in several shows both in Oregon and Atlanta, Ga.

Anthony was instrumental in shaping the political rights of American women.

• "From Lady Macbeth to Lady Hillary: A Literary Look at Where We Have Been and Where We Are Going," presented by Inga Wiehl, will be from 7 to 8 p.m. March 1 in the Grice Center.

Wiehl is an English instructor at Yakima Valley Community College.

Wiehl will examine Lady Macbeth in her role as a helmsmate and hostess, in society in which she played these roles, and the reasons Macbeth has been criticized by critics and audiences.

UNFORTUNATELY, THIS IS WHERE PEOPLE ARE PUTTING TOO MANY RETIREMENT DOLLARS.

Every year, a lot of people make a huge mistake on their taxes. They don't take advantage of tax deferral and wind up sending Uncle Sam money they could be saving for retirement.

Fortunately, that's a mistake you can easily avoid with TIAA-CREF SRAs. SRAs not only ease your current tax burden, they can also help you enjoy many happy returns.

Benefit now from tax deferral. Call our SRA hotline 1-800-842-2733, ext. 8016.

TIAA-CREF
75 years of ensuring the future for those who shape it.
The Psychology behind the Citibank Classic Visa card: The emotional security of the Photocard, now with No Annual Fee.

The Citibank Classic Visa® instills in students feelings of safety, security, and general wellness not unlike those experienced in the womb. Therefore, it is the mother of all credit cards. Some experts attribute these feelings to the Citibank Photocard, the first credit card with your photo on it. A voice inside says, “This is me, really me.” (As opposed to, “Who the heck is that?” — a common response to the photo on one’s Student ID.) It’s an immediate form of ID, a boost to your self-image. Of course if your card is ever lost or stolen and a stranger is prevented from using it, you’ll feel exceptionally good (showing no signs of Credit Card Theft Nervosa). Other experts point to other services, such as The Lost Wallet® Service that can replace your card usually within 24 hours. Or the 24-Hour Customer Service line, your hotline if you will, for any card-related anxiety whatsoever.

Further analysis reveals three services that protect the services you make on the Citibank Classic Visa card, at no additional cost. 1. Buyers Security™ can cover them against accidental damage, fire or theft, for 90 days from the date of purchase (preventing, of course, Insecurity). 2. Citibank Lifetime Warranty™ allows one to extend the warranty for the expected service life of eligible products up to 12 years. And Citibank Price Protection assures you of the best price. You need only see the same item advertised in print for less within 60 days, and Citibank will refund the difference up to $150 (hence no Post Purchase Depression). Special student savings are particularly therapeutic. For example, you can receive a $20 Airfare Discount on any domestic flight. (Case studies indicate that a Fear of Flying is overcome when Spring Break in sunny Florida is a possibility.) Not to mention savings on mail order purchases, sports equipment, magazines and music; a low variable interest rate of 15.4% and No Annual Fee. Suffice it to say, you’ll have a credit card you can depend on while building a credit card history. So, call 1-800-CITIBANK (1-800-248-4226), extension 19, to apply over the phone (students don’t need a job or cosigner) or to have your photo added to your Citibank Classic Visa card. If we say that a sense of Identity is the first component of the Citibank Classic Visa card, a sense of Security the second, and a sense of Autonomous Will from your newfound financial independence the third, don’t be crazy... Call.

The Monarch Notes Version:
The Citibank Classic card gives students no annual fee, peace of mind, protection against Freud—or rather fraud—and a low rate. Apply today. Call 1-800-CITIBANK (1-800-248-4226), ext. 19.
Men's 400-meter freestyle relay, Davis wins event

by Deborah Irmer
Staff reporter

Swimmers flooded the pool-side adorned in every color imaginable last weekend. Entire teams chanted in support of their teammates. Enthusiasm and excitement charged the air as swimmers perched themselves precariously on the edges of their starting blocks, anxiously awaiting the distinctive firing of the starting gun.

Crash!

They're off with an explosion of pent-up energy with one thing on their minds—to qualify for nationals.

This was the situation Thursday through Saturday at Central's Aquatic Facility when Central hosted Pacific Northwest Small-College Swimming and Diving Championships. More than 10 schools participated. Although the three-day district championships were grueling and tiring, Central's men's and women's teams both took second place in the meet.

The University of Puget Sound took first place in both the men's and women's meets. In men's action, Jason Hart came in fourth in the 1400-meter freestyle with a time of 17:02.86. One of Hart's strong points was his turn, which helped him edge a few swimmers.

In the 200-meter backstroke, Central's Kevin Daniel placed eighth with 2:03.63. Bill Bush placed ninth with 2:03.07 and John Schrock placed 15th with 2:08.15. In the 100-meter freestyle, Central's Rabi Pfeifer placed second with 0:47.71. Team captain Ben Gleweski placed sixth with 0:48.19 and Mike Dougherty placed seventh with 0:48.21.

Also placing for Central in the 100-meter freestyle were Rod Chamberlain in 11th place with a time of 0:48.21. Jon Stemp finished in 12th place with 0:49.21. In the men's 200-meter butterfly, Central's Chris Bolla placed sixth with 2:01.11, Dave Kahler placed seventh with 2:01.52 and Gary Ames placed eighth with 2:01.66.

In the 200-meter breaststroke, Central's Kris Kleahe placed fifth with 2:16.99 and Kevin Gibson placed 10th with 2:17.30.

To top off the men's action, the Central 400-meter freestyle relay team swept the competition with first place and a time of 3:09.72. In women's action, Central's Laurie Franchini placed third with 18:32.05 and Ali Landry placed fifth with 19:02.83 in the 1600-meter freestyle.

In the 200-meter backstroke, Central's Molly Kennedy took seventh place with an overall time of 2:19.32, Jodie Nelson placed eighth with 2:20.19.

In the 200-meter breaststroke, Central's Cariene Davis edged the competition to take first place with 2:28.74, which is two seconds better than the national qualifying time. She was followed by Marina Cardenas who placed 10th with 2:35.33. Mary Williams placed 11th with 2:40.03.

In 400-meter freestyle relay action, Central's relay team consisting of Carriane Davis, Annette Harris, Laurie Morris and Julie Morris took second with an overall time of 3:41.98.

"Everyone was tired after three days of hard swimming, but the whole meet was worth the last two relays," head coach Lori Clark said.

Although she knows the swimmers will get a lot faster, she hopes to see some personal-best times, perhaps even some school records at the national swim meet March 2-5 in Federal Way.

Swimmers place second in districts

by Chuck E. Case
Staff reporter

The Central men's basketball team continued its hot streak with a 72-59 win at the University of Puget Sound Thursday, but its three-game winning streak ended with a 72-64 loss Saturday at Simon Fraser University.

Central missed its chance at finishing second in the Pacific Northwest Region, which would have given it a first-round bye in the region with a win in its last regular-season game against Lewis & Clark State University, plus a loss by fifth-place Seattle University.

Central started off the game against Pacific Northwest with scoring the first nine points. Junior guard Ryan Pepper, a law and justice major, accounted for the first five of these points.

But then Puget Sound went on a streak of its own, scoring the next seven points to cut the Wildcat lead to two. With 5:57 left in the half, a three-pointer by Todd Doolittle gave the Loggers their first lead of the ballgame, 16-15.

With more than six minutes left, Puget Sound increased its lead to 22-17. Then Central went on an 11-3 run in the next two minutes to regain the lead.

Central widened its lead to six with 1:19 left in the first half. Whitney Dixon of Puget Sound closed the half with five straight points to make the halftime score 35-34 in Central's favor.

Central extended the lead to 52-38 with 9:12 left in the game. Ryan Pepper scored Central's 17 points in this stretch. Less than four minutes later Central achieved its biggest lead of the game when junior forward Ryan Silver, a public relations major, hit a layup to make the score 59-40.

The closest Puget Sound came from that point was 11 points. Central ended the game by scoring five straight points.

The win was Central's fifth in its last six games and put the team at the .500 mark in region play for the first time this season.

Ryan Pepper had 32 points to lead all scorers. Silver added 20 points and a game-high 11 rebounds, and senior center Wade Venters, a law and justice major, had 12 points and eight rebounds.

Ryan Pepper and Silver again led the Wildcats in scoring against Simon Fraser. Silver scored 22 points and Ryan Pepper added 21 to help Central to a 57-55 lead with 8:10 left in the game.

However, neither Ryan Pepper nor Silver scored again. Central, as a team, scored only seven points the rest of the game. Simon Fraser took advantage of Central's lack of offense down the stretch and snapped the Wildcats' modest three-game winning streak.

Central had many opportunities down the stretch, but just could not convert, head coach Gil Coleman said.

"We had four or five real good short shots down the stretch," Coleman said.

The loss to Simon Fraser was Central's second loss in its last seven games. Ryan Pepper said the key to this hot streak was Central's togetherness.

"We've been playing really well together," Ryan Pepper said. "No one player in particular has stood out, just great teamwork." The regular season finale against Lewis & Clark State is at 7:30 p.m., Feb. 26 at Nicholson Pavilion.

Lewis & Clark State hand Wildcat women their 14th straight loss

by Ernest M. Baldwin
Staff reporter

The Central women's basketball team suffered its 14th straight loss Friday, losing to Lewis & Clark State University 89-80.

The Wildcats are now 4-18 overall and 0-10 in league play for the season.

Central started the game strong by keeping the 10th-ranked Warriors close and never letting them run away with the game. The Wildcats were only down by nine points going into halftime.

Lewis & Clark went on a run and built a 23-point lead by the middle of the second half. But the Wildcats did not throw in the towel, cutting the deficit to five points with 90 seconds left in the game.

But, Central missed a couple of opportunities to cut the lead even further.

"We refused to quit down the stretch and played with a lot of pride," head coach Nancy Katzen said.

The Wildcats were led in scoring by three seniors. Shelly Bell, a criminal law and psychology major, had 21 points to lead Central. Karla Hawes, an education major, had 17 points and eight rebounds, and Jennifer Yount, a health education major, had 15 points and a team-high 11 rebounds.

The Warriors had a balanced scoring attack led by Alyson Rottlin, who had 16 points and a game-high 16 rebounds. The Wildcats had five players in double figures.

The Central women's last home game of the season was against arch-rival Western Washington University Feb. 22 in Nicholson Pavilion. The results were not available at press time.

The last game of the season for the Wildcats will be at 6 p.m. Feb. 25 at Seattle University. WILDCAT NOTES: Hawes, Yount, Bell, Kristi Payne and Becky Fitzgerald will end their Wildcat careers Saturday. All are seniors.
The Central wrestling team finished its dual-meet schedule with two losses, a 16-15 decision to Pacific Lutheran University and a 27-12 loss to Simon Fraser University over the weekend.

The Wildcats ended their dual-meet schedule with a two losses, a 16-15 decision to Pacific Lutheran defeated Central's Jason Vose at 142 pounds, Brett Licia at 150 pounds, Jason Vose at 190 pounds and Paul Martinez at 275 pounds.

"Joe Knox had a good match on Friday," Olson said. The match was 9-6 in Central's favor before Brian Peterson of Pacific Lutheran defeated Central's Adam Scanlon 14-5 and gave the Lutes a 10-9 lead. Pacific Lutheran defeated Central's Erik Lutes at 134 pounds, Jason Stevenson at 142 pounds, Brett Licia at 150 pounds, Jason Vose at 190 pounds and Paul Martinez at 275 pounds.

"It's a big blow to Erik and a big blow to the team," head coach Greg McDowell qualified for nationals but suffered a knee injury Jan. 6 against Southern Oregon University.

The Wildcats ended their dual-meet schedule with a two losses, a 16-15 decision to Pacific Lutheran defeated Central's Adam Scanlon 14-5 and gave the Lutes a 10-9 lead. Pacific Lutheran won the next two matches to put the meet out of Central's reach. Against Simon Fraser, the Wildcats won the first three matches and jumped out to a 12-0 lead. Chad Burd won by forfeit at 118 pounds.

Chad Requa defeated Anders Bloomgren 12-7 and Knox rolled over his opponent 9-4.

Next up for the Central wrestlers is the district wrestling tournament Feb. 25.
Boles goes through NFL recruiting

by Mark R. Temple

Production manager

"The end of football season at Central doesn't necessarily mean the end of a career for graduating seniors.

Players who choose to make a career of football have the opportunity to continue in several different forms. At junior status on the team, they become eligible for scouting from professional sports franchises.

Jeff Zenisek, acting athletic director and head football coach for the Wildcats, concludes the scouting habits of professional football scouts to those of college scouts looking for high school recruits.

"When scouts come to Central in the fall, they begin their search by looking at film," Zenisek said. "It's much the same thing we do when we look at high school kids." The scouts' testing looks mostly at the athlete's ability to play. "They look at their 40 yard dash times, their height and weight," Zenisek said. From those averages, they determine whether they have what it takes to play professional football.

Boles said coming from a small school, he had to show a significant performance to be drafted. "I was lucky I had my size and speed to work for me," Boles said.

He has a 4.4 second 40-yard dash time with the NFL and at 6' 3" is taller than the average NFL wide receiver. "I was lucky I had the size and I was lightly built," Boles said. "I'm only 160 pounds, but I can run." He said he knew he could play professionally because the NFL scouts testing looks mostly at the athlete's ability to play. "At the combine, they can't hold you down," Boles said. "They are looking for high school recruits." The majority of players are chosen from larger colleges, but some players do come from smaller universities, Zenisek said.

"The coaches need to come in and test them," Zenisek said. "They have an opportunity to see the film, they are going to stand out," Zenisek said. "Some players don't have the opportunity to play the game they love. Naturally they want the National Football League, but any opportunity they will remember."
